

AKISH ANIL PANDEY

Computer Engineer (Currently Pursuing)

Email Id: akishpandey2006@gmail.com | Mobile no: +91 8698610571

[Linkedin](#)

CAREER OBJECTIVE:

To work in a dynamic environment where I can enhance my skills, contribute to the organization's growth, and achieve career success through dedication and collaboration with experienced professionals.

EDUCATIONAL DETAILS:

B.E. in Computer Engineering – Currently Pursuing

Sept 2024 – May 2028

Thakur College of Engineering and Technology (Autonomous)

HSC – 89%

March 2024

(Maharashtra State Board of Secondary and Higher Secondary Education)

MHT – CET – 97.7 Percentile

May 2024

(MHTCET - Maharashtra Common Entrance Test, a state-level exam for admission to undergraduate engineering)

SSC – 86%

March 2022

(Maharashtra State Board of Secondary and Higher Secondary Education)

INTERNSHIP:

Cybersecurity Internship – Cyber Peace Foundation

06-01-2025 to 10-01-2025

Completed an internship with Cyber Peace Foundation, where I gained hands-on experience in cybersecurity, enhancing my skills in threat analysis and risk assessment. Contributed to initiatives aimed at strengthening digital security practices.

TECHNICAL SKILLS:

- Programming Languages: HTML5, CSS3, JavaScript, Java, Python
- Libraries/Frameworks: Node.js, Express.js, React.js, Bootstrap, Tailwind
- Tools/Platforms: Github, VS Code, MS Office
- Databases: SQL, MongoDB

PROJECTS:

React-Based Online Trading Platform Clone: (Github - <https://github.com/akish99/Zerodha-Project.git>)

Created a React-based Zerodha-like trading dashboard using MERN stack with secure login, RESTful API integration using Axios, charts (Chart.js), and modular MVC backend with Node.js, Express Router, Mongoose, and JWT-based authentication.

SigmaGPT – Full Stack AI Chat Application (Github - <https://github.com/akish99/Sigma-GPT.git>)

Developed a secure ChatGPT-like web application using the Google Gemini API with JWT-based authentication and MongoDB backend. Built RESTful APIs using Express.js and implemented password hashing with bcrypt for secure user management.

Airbnb-Inspired Rental Platform:

Node.js, Express.js, MongoDB, Bootstrap, HTML5, CSS3

Developed a Airbnb like Rental Platform with Local strategies based authentication system to ensure secure login and access control using **Passport**. For file uploads, **Multer** with **Cloudinary** is integrated via **multer-storage-cloudinary** to directly upload and store user images in the cloud. Also implemented scalable **MVC** architecture and optimized API performance.

CERTIFICATIONS:

Full Stack Web Development & Java with DSA (Apna College)

Currently pursuing Full Stack Web Development and Java with DSA courses from Apna College, focusing on web technologies, back-end development, and data structures and algorithms.

Python Certification (Spoken Tutorial, IIT Bombay)

Completed a comprehensive Python course from Spoken Tutorial, IIT Bombay, covering core programming concepts, data structures, and object-oriented programming.
